

Environmental Information for Electricity offered by Select Energy, Inc.

(This is a new energy product. Select Energy has made no guarantee as to the environmental characteristics of the energy to be supplied from January through December, 2000. The data shown below are default values, and do not necessarily reflect the energy that Select Energy will supply.)

Select Energy, Inc. Electricity

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricity product with electricity products offered by other electric suppliers.

Energy Source

Default values are shown which represent 1996 regional averages.

| | |
|-----------------------|-------------|
| Coal | 49% |
| Gas | 7% |
| Hydroelectric (large) | 2% |
| Nuclear | 34% |
| Oil | 6% |
| Renewable energy | |
| Captured methane gas | 0% |
| Fuel cells | 0% |
| Geothermal | 0% |
| Hydroelectric (small) | 0% |
| Solar | 0% |
| Solid waste | 2% |
| Wind | 0% |
| Wood or other biomass | 0% |
| TOTAL | 100% |

Renewable energy sources subtotal 2%.

Air Emissions

The emission data given are default values and represent the average amount of air pollution associated with the generation of electricity in the region. This amount is compared to the New Jersey benchmark. The benchmark approximates the average emission rate for all electricity generation in New Jersey.

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x react to form acids found in acid rain. NO_x also reacts to form ground level ozone, an unhealthful component of "smog."

Energy Conservation

Select Energy is not investing in energy conservation measures for this electricity product. Energy conservation measures means less electricity needs to be generated and pollution is avoided.

| Avoided generation | Avoided Air Emissions | |
|--------------------|-----------------------|-----------------|
| 0 kWh | 0 tons | CO ₂ |
| | 0 tons | NO _x |
| | 0 tons | SO ₂ |
